### LISTING OF CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

1-26 (Canceled)

27. (Currently Amended) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis and having a power activator switch mounted thereon, wherein the handle has a power supply end;
- c. a battery engaged with the power supply end and having at least a portion of the battery extending generally perpendicular to the handle axis;
- d. a detecting device releasably attached to ~~a mounting surface on at least one of the housing, the handle portion, or the battery,~~ and
- e. a light source disposed on the power supply end.

28. (Previously presented) The portable tool of claim 27 further comprising:

- a. a first fastener on one of the housing, the handle portion, or the battery and
- b. a second fastener on the detecting device to releasably cooperate with the first fastener.

29. – 35. (Canceled)

36. (Currently Amended) A portable power tool comprising:

- a. a housing;
- b. a drive mechanism contained in the housing;
- c. a handle portion aligned along a handle axis and attached to the housing and having a power activator switch mounted thereon;

Appl. No. 10/092,379

10710/151 (PTG-0867-US)

Reply to Office Action of April 20, 2004

d. a battery engaged with the handle portion and having at least a portion of the battery extending generally perpendicular to the handle axis; and

e. a measuring device comprising a body and a sensor, wherein the measuring device is releasably attached to ~~one of the housing, the handle portion, or~~ the battery.

37. (Previously presented) The portable power tool of claim 36 wherein the battery is in electrical communication with the drive mechanism to power the portable power tool and the measuring device is in electrical communication with the battery.

38. (Canceled)

39. (Canceled)

40. (Previously presented) The portable power tool of claim 36 further comprising a rotary output shaft along a tool axis and connected to the drive mechanism.

41. (Canceled)

42. (Canceled)

43. (Canceled)

44. (Canceled)

45. (Previously presented) A portable power tool comprising:

a. an elongated motor housing generally aligned along a tool axis, the housing provided with a forward end, a rear end, an upper surface, and a lower surface which forms a handle;

b. a battery engaged with the handle and having at least a portion of the battery extending generally parallel to the tool axis; and,

Appl. No. 10/092,379

10710/151 (PTG-0867-US)

Reply to Office Action of April 20, 2004

c. a measuring device removably affixed to ~~at least one of the motor housing, the handle, or the battery~~ wherein the measuring device can be detached and used separate from the portable power tool.

46. (Canceled)

47. (Canceled)

48. (Canceled)

49. (Canceled)

50. (Currently Amended) A detecting device for a portable power tool that has a housing, a handle portion, a battery engaged with the handle portion and having at least a portion aligned generally perpendicular to the handle portion, and a mounting surface on ~~one of the housing, handle portion, or the battery~~, the detecting device comprising a body configured to releasably attach to the mounting surface.

51. (Previously presented) The detecting device of claim 50 further comprising a fastener to cooperate with the mounting surface to releasably secure the detecting device to the portable power tool.

52. (Previously presented) The detecting device of claim 50 wherein the portable power tool has a slot proximate the mounting surface and the detecting device further comprises a portion sized to be received within the slot.

53. (Canceled)

54. (Canceled)

55. (Canceled)

Appl. No. 10/092,379  
10710/151 (PTG-0887-US)  
Reply to Office Action of April 20, 2004

56. (Previously presented) The portable power tool of claim 27 further comprising a cavity oriented generally perpendicular to the handle axis to retain objects placed within the cavity.

57. (Previously presented) The portable power tool of claim 56 wherein the cavity includes a magnetic surface to retain magnetic objects.

58. (Previously presented) The portable power tool of claim 27 further comprising a magnetic surface oriented generally perpendicular to the handle axis to retain magnetic objects placed on the magnetic surface.

59. (Previously presented) The portable power tool of claim 45 further comprising a cavity oriented generally perpendicular to the handle axis to retain objects placed within the cavity.

60. (Previously presented) The portable power tool of claim 59 wherein the cavity includes a magnetic surface to retain magnetic objects.

61. (Previously presented) The portable power tool of claim 45 further comprising a magnetic surface oriented generally perpendicular to the handle axis to retain magnetic objects placed on the magnetic surface.

62. (Canceled)

63. (Canceled)

64. (Canceled)

65. (Currently amended) A portable power tool comprising:  
a. a housing comprising a drive mechanism and a motor;

Appl. No. 10/092,379  
10710/151 (PTG-0867-US)  
Reply to Office Action of April 20, 2004

- b. a handle portion attached to the housing and aligned along a handle axis and having a power supply end;
- c. a detecting device located at one of the housing or the handle portion; and
- d. a cavity integrally formed on a surface of the power supply end and having a magnetic surface to magnetically retain objects placed within the cavity.

66. (Canceled)

67. (Previously presented) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis and having a power supply end;
- c. a detecting device located at one of the housing or the handle portion; and
- d. a magnetic surface integrally formed on a surface of the power supply end to retain magnetic objects placed on the magnetic surface.

68. (Previously presented) The portable power tool of claim 67 wherein the magnetic surface is located within a cavity provided on the surface of the power supply end.

69. (Currently amended) The portable power tool of claim 65 further comprising a battery engaged with the power supply end and having at least a portion aligned generally perpendicular to the handle axis.

70. (Currently amended) The portable power tool of claim 67 further comprising a battery engaged with the power supply end and having at least a portion aligned generally perpendicular to the handle axis.

71. (Previously presented) The portable power tool of claim 27 wherein light source provides illumination of at least a portion of a tool end, which is aligned with the housing.

Appl. No. 10/092,379

10710/151 (PTG-0867-US)

72. (Currently amended) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis

and having a power supply end;

- c. a detecting device located at one of the housing or the handle portion; and
- d. a light source provided on a surface of the power supply end; and
- e. at least a portion of the power supply end magnetically retaining magnetic objects.

73. (Previously presented) The power tool of claim 72 wherein the light housing is pivotable.

74. (Previously presented) The power tool of claim 72 wherein the light housing includes a lens that covers the light source.

75. (Previously presented) The power tool of claim 72 wherein the light source provides illumination of at least a portion of a tool end, which is aligned with the housing.

76. (Canceled)

77. (Previously presented) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis

and having a power supply end; and

- c. a magnetic surface provided on a surface of the power supply end to retain magnetic objects placed on the magnetic surface.

78. (Previously presented) The portable power tool of claim 77 wherein the power supply end comprises a battery.

Appl. No. 10/092,379

10710/151 (PTG-0867-US)

Reply to Office Action of April 20, 2004

86. (New) The portable power tool of claim 83 wherein the portion for magnetically retaining magnetic objects is oriented generally perpendicular to the handle axis.

Appl. No. 10/092,379

10710/151 (PTG-0867-US)

Reply to Office Action of April 20, 2004

79. (Previously presented) The portable power tool of claim 77 wherein the magnetic surface is oriented generally perpendicular to the handle axis.

80. (New) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis and having a power supply end; and
- c. at least a portion of a surface of the power supply end magnetically retaining magnetic objects placed on the surface.

81. (New) The portable power tool of claim 80 wherein the power supply end comprises a battery.

82. (New) The portable power tool of claim 80 wherein the magnetically retaining portion is removably mountable to the power supply end.

83. (New) A portable power tool comprising:

- a. a housing comprising a drive mechanism and a motor;
- b. a handle portion attached to the housing and aligned along a handle axis and having a power supply end; and
- c. a removable portion mountable to the power supply end, wherein the removable portion has at least a portion for magnetically retaining magnetic objects placed on the surface.

84. (New) The portable power tool of claim 83 further comprising a detecting device releasably attached to at least one of the housing, the handle portion, or the removable portion.

85. (New) The portable power tool of claim 83 further comprising a light source disposed on one of the power supply end or the removable portion.
